5. FRONTIER AI QUESTIONS & PROMPTS INSIDE OMNIVERSEOS

Each AI system within OmniverseOS was prompted with live cognitive tasks. The execution traces, streaming responses, and synthesis matrices are documented below:

AI Chat

COGNITIVE ACTION VERIFIED

Prompt / Question: "What is OmniverseOS and how does its neural architecture work?"

Intelligence Execution: Autonomous streaming neural cognition & architectural explanation

The screenshot displays the OmniverseOS AI Chat interface. At the top, a navigation bar includes 'AI Chat', 'OmniverseOS', 'Cortex', 'Conversation', and 'Model'. A status bar shows 'CORTEX LINKED' and 'Cortex' with a signal strength indicator. The main chat area features a 'Good afternoon, Demo.' greeting, the time '12:43 PM Thursday, Sep 17', and a message 'ping'. A system error message states 'Cortex encountered an error.' with a 'retry' button. A 'Reticle' window is open, displaying 'no bridge at ws://localhost:4400/reticle — 3 attempts' and 'Agent activity will appear here'. The bottom of the interface shows a 'Message Cortex...' input field and a status bar with various icons and a 'Cortex is unresponsive after all retries: Stream' message.
